

MAGGIDAN'S SALES LIST 2018

Our herd is tested yearly for CAE and Johne's. We do not blood test for CL. Our herd has never had abscesses. Copies of the latest test available upon request. We have bred and shown pygmies for 26 +years. Our goal is to breed true to the breed standard producing clearly masculine bucks and feminine does, without being extreme. We breed for easy pregnancy and kidding, and a long productive life. We have begun breeding first-gen Kinders from Nubian does that are true dual-purpose and our champion pygmy bucks. Pictures are taken completely natural and unposed (except first one of Bellagio).

I may consider selling Bellagio to the right home. He is a big boy, very easy to handle with good manners. If you are looking for decent width and bone, a longer body for easier pregnancy and kidding, plenty of depth, this could be your boy. He would make a GREAT Kinder maker. He has several wins: 2x Grand and 3x Reserve Grand as a 2 and 3 year old. \$500.00

KINDER BUCKS

All Kinders are F1 generation. I chose Nubian does from a long-time tested herd. The breeder focuses on preserving the dual purpose type Nubian with very good udders and high milk production. Her goats are also fast growing with good bone, overall width and depth, and heavy muscling.

Maggidan's REMUS	PENDING	5/30/18	M2/K17	Maggidan's Minis Runamuk Ramsey Emikota
---------------------	---------	---------	--------	--

Nearly matching buckling brothers. Their dam's udder maybe could be better maybe and is uneven from nursing trips. But it is attached reasonably well, smooth fore udder. There could be some moon spots under there, their dam is quite spotted. They are very smoothly blended, great angulation, nice head carriage, strong straight legs and pasterns. First row of pictures taken on August 13 at 10 weeks old. Second and third row taken on October 1 at almost 18 weeks old . \$200.00
