

MAGGIDAN'S SALES LIST

Our herd is tested yearly for CAE and Johne's. We do not blood test for CL. Our herd has never had abscesses. Copies of the latest test available upon request. We have bred and shown pygmies for 26 +years. Our goal is to breed true to the breed standard producing clearly masculine bucks and feminine does, without being extreme. We breed for easy pregnancy and kidding, and a long productive life. We have begun breeding first-gen Kinders from Nubian does that are true dual-purpose and our champion pygmy bucks. Pictures are taken completely natural and unposed.

PYGMIES

BUCKS

Maggidan's Minis CAPT. FANTASTIC	PENDING	4/18/18	840003131836084 M2/K6	PGCH BCE Jupe Jr. AKA "JJ" Maggidan's Minis Fantasia
-------------------------------------	---------	---------	--------------------------	---------------------------------------------------------

Oh my, the camera loves this buck. I'll just let the pictures speak for themselves. First row of pictures taken on August 13 at 4 months old. Second row taken on October 1 at almost 5.5 months old. \$450.00

WETHERS

Both of these young adult wethers are exceptional show quality and priced at 150.00.

Calypso

Tad

Maggidan's Minis CALYPSO	28568M	7/11/16	840003131836060 M2/H11	Aribba Acres Java Jo Burntwood Farms Tanzerin
Maggidan's Minis TAD	16292W	4/27/17	840003131836072 M2/J6	Aribba Acres Java Jo Burntwood Farms Tanzerin

KINDER BUCKS

All Kinders are F1 generation. I chose Nubian does from a long-time tested herd. The breeder focuses on preserving the dual purpose type Nubian with very good udders and high milk production. Her goats are also fast growing with good bone, overall width and depth, and heavy muscling.

Maggidan's ROMULUS 1186018B 5/30/18 M2/K16 Maggidan's Minis Runamuk Ramsey Emikota

Maggidan's REMUS 1186020B 5/30/18 M2/K17 Maggidan's Minis Runamuk Ramsey Emikota

Nearly matching buckling brothers. Their dam's udder maybe could be better maybe and is uneven from nursing trips. But it is attached reasonably well, smooth fore udder. There could be some moon spots under there, their dam is quite spotted. They are very smoothly blended, great angulation, nice head carriage, strong straight legs and pasterns. First row of pictures taken on August 13 at 10 weeks old. Second and third row taken on October 1 at almost 18 weeks old. Romulus took a Grand Champion and Remus took a Reserve Grand Champion at the Kinder show in November 2018 in Liberty, NC. \$200.00
